ORDER IS COMING OUT OF CHAOS

The Burnt District Will Soon Be Covered by Substantial and Elegant Structures Additional Lasses.

SICKANE FALLS, W.T. Aug. 7—The thorough farts in the burnt district presented an animated appearance to-day. Several hundred tents were created for business purposes, and the ludicrous ness of the situation coupled with the avowed determination and the unustratable ovidences of extreatness on the part of the moneyed men of the city to rebuild on a grander and more substantial scale than is fore, kept everybody in a remarkably good huner. Hundreds of laborurs are at work clearing, up the streets removing the labrist from their or is, cleaning brick and making preparations for building. The Governor Reports That He Cannot See His Way Clear to Intervens-The Eppreme

Binon THE OREGONIAN announced several days Since THE Cargeonian announced several days ago that Governor Pennoyer had made up his mind not to intervene in behalf of the marderer, Chee Cong, the friends of the condemned man have been urging the governor to commute his autence to imprisonment for life. But it is all to no purpose, Governor Pennoyer said last night that he could not see his wey clear to do anything, and Chee Gong will be hanged to-morrow. The erection of the gallows was begun yesterday.

On Tuesday, Williams & Wood, Chee Gong's attempts went before the supreme court and

rests upon the following grounds:
First—The failure of the court to consider the question that the evidence does not make out a case of murder in the first degree.

Second—The failure of the court to consider the question of the separation of the jury.
Third—The failure of the court to consider the question "Can one on trial for murder waive, either in person or by coursed his right to be present at a view of the premises where the alloyed murder was committed, such view being ordered by the court on the application of the presecuting atterney.

their application as follows:

We bog, too, that the court will strain every point and go as far as it can consistently do with its souse of duty in this matter. It is surely better that sirtle practice should be departed from than that course! should have resting upon their professional consciouse the loss of a client's life for a purely technical fault. We are convinced of having striven to the best of our abilities in this case of having spared no inonest effort to secure what we believed to be our ellent's rights. And while we are not prepared to admit that any mistake has been made—indeed, we think that we have completely vindicated the practice used by us ou this appeal—the NO HOPE WOR A REMEARING

Governor Ponnoyer returned from Salem yesternlay and an Oregonnan reporter called at his
residence to sak if he had decided to do anything
for thise Gong. When the reporter arrived, Mr. A.
McKunie, a member of the first Jury that convicted the Calamana of murder in the first dogree, and Mr. Rosenthal, the Chinese
outer, were urging the governor to commute
the death seatence of the condemned man, of
whose inneuroence both felt satisfied. After they
had taken their departure, the governor was
asked if he intended to respite Chee Gong until
after the produing motion for a rehearing of the
appeal could be heard. if he intenses of a rehearing or and the pending motion for a rehearing or and enuld be heard.

Inder the rule of the supreme court it is now the impossible for it to entertain such a more replied the governor. "We be rules such a form must be made and filed within ten days and the suprementation of the rules and the court is announced."

NO BORAL RIGHT TO INTERPERE.

"As I told you before, I cannot see my way clear to intervene in this case. Two Irlals have been had. No new testimony has been additional since the last triad, While I have arbitrary power to intervene, I cannot discover the moral right. The power of granting partons and commutations was placed with the scentive for exercises in extraordinary cases only and not for the purpose of interrupting the due course of law in ordinary cases. The longer I remain in office the increarrial become in regard to the exert is of that power; and the recent debutes in the Wachington constitutional ouvention, where there was a large and active mileority in favor if simpling the exert seed that power is the constitutional ouvention, where there was a large and active mileority in favor of extintional constitutions of the enforcement of great dars should be accounted donois to me that great dars should be forced and to offend a just pull lower by the undeen set to offend a just pull lower by the undeen set of this power in preventing such enforcement."

The governor further said that the application made for commutation on the ground of the unreliability of Chinone testimony, if hold good, would affind, in all cases of nurder among that people, an immunity from punishment on the part of the Chinese which our own outens do not posses, and would be fruitful of such scene as were with

Mayor DeLashmutt's Very Pertinent Suggestions About Fire Matters.

A Big Grist of Soutine Business-Petitions, Comand Ordinances, Etc., Considered.

There was a great deal of business to come be-fore the souncel last night, and for su hour before the time of the meeting the andilor's office was crowded with persons bringing in patitions or triging the passage of some measure in which they were interested. When the maynr called the cept Castendieck and Hoyt.

thing about the risk of sending our engines so far away from the closely populated portion of the city.

Our present department is adequate to the protection of the central portion of the city, but some provision should be made for the extreme ends of the city either by placing the present engines intriner apart or by establishing other stations up and down the river. The long and unbroken line of wineres along the river front, which has littlen to been the hetbed of some of our most sangularly fires, requires some protection from the river side, which ought to continue the sangularly fires, requires some protection from the river side, which ought to form the river side, which ought on the form the sangularly fires, requires some protection from the river side, which would probably cost not less than \$6,000, by making arrangements with one of the ferry boats to perform the service, still this at hest will only be a temporary makeshift, excusable for the lack of authority to levy more than a \$45 mill tax for fire purposes.

East Portland and Aiblian are equally interested in this matter, and no doubt, would be willing to do their part, since, as a matter of fact, their river front practically has no five protection. In think arrangements on be machined the modans, and it professions that programs and that a committee be aspointed to look into the matter, confer with the fire commissioners, the proper authorities of the cities of Albian and East Portland, and make such arrangements as they does not the public good.

There was a petition from many clitters in regard to a fire boat, and the manyor was instructed to appoint a committee of two to confer with East Portland and Albian in regard to the matter.

The mayor appointed as such committee Measure.

CHICAGO, Aug 7.—This morning Judge Baker issued a writ of habeas corpus for the release of Martin Burke, the Crowin anspect. The writ was obtained by Lawyer Kennedy, who has been to fused bermission to see his olient, returnshie at a o'clock this afternoon, but was issued with the ordered with the understanding that if the offinials permitted Kaonedy to see Burke before that hour the matter would be dropped. The chief of police allowed a friend of Dr Crooln's theo that burke this morning, presumably for identification, and the satisfaction by his friends.

Chief of Police Hubbard, in company with several of Dr. Crooln's friends, went down to see Burke this afternoon for the purpose of identification. Hubbard carried him a letter which had been in the North hide postofice some time for hurke it was from his mother in love. The opening of the letter and perused it. A QUESTION OF CUSTORY.

At \$ P M, the hour upon which the writ in the Burke habens corpus case was made returnable, Chief Hubbard, State's Autorney Longenecker and Corporation Counsel Hutchinson appeared before Judge Baker. The latter, without any preliminary, made an unexpected declaration in the case, to wit, that Burke was not in the custody of Chief. Hubbard at all, Hutchinson contended that Burke was in the hadds of Officer Collina, who held him on a requisition, and who was acting as a messenger for the president of the Juliad States. A hurded consultation here took places between Senator Kennedy and Lawyer Forrest, attorney for Coughilu, who was present in the controon.

Kennedy than demurred to the rule on the ground that it was eventure. When applied to restrain Julius and had said that Burko was in his custody, and that the prisoner would be kept as the custody, and that the prisoner would be kept as the custody.

A wrangle between the lawyers in court ensued, a mangic netween the lawyers in court cursted, which was finally ent short by Judge Baker sarying: "There is no doubt that Burke is entitled to see his attorney, and that Kennedy has a right lot talk with his client. As for the custody of the prisoner, there can be no doubt that it list in the hands of the person holding the writt of extradition."

Burke's lawyer then drew up a new petition asking that the writ of habets corpus be directed to officer Collina, on the ground that that office was bound under his commission as measurger bring Burke into Hilmons and to turn him eyes to

CHICAGO, Aug. 7.—Late to night it is reported with much positiveness that Burke has confessed. The story goes that he had an interview of two hours duration with States Attorney Longnecker and Chief of Police Hubbard The assention is made that a letter signed by Burke will be produced in court to-morrow repudiating Honnedy as his attorney. The details of the alloged confession are lacking, and no official confirmation can be had.

The capture of the stage robbers, Dodd and Walker, who robbed the Linkvitle Lakeriew stage near Kune birings on July 7, was undoubtedly a surprise to many people, as there seemed to be no effort being made on the part of the officers to find the criminals. But it is seems that the identity of the high-waymen was suspected, from the first, and the capture was delayed in bridge that conclusive evidence could be obtained. Sponkers Frize, Adg. 7.—That the people of Spokane Fells have by no means lost leart by the recent terrible disaster, nor are inclined to abandon the city by the falls, is evidenced by the preparations already being mada to place the prond city of the northwest empire in the position it is clearly entitled to. Fravored by nature with advantages rarely combined, biessed with healthful climate, pure water and a fertile soil, good timber and rich mines, as its immediate adjuncts; with unlimited natural power for machinery at its doors, it is not to be supposed that the city of Spokane will disappear amid even more wildenyeed a configuration as a lingle than the city of Spokane will disappear amid even more wildenyeed a configuration than they taken the lead?" and be replied: "Yes, I think all of us that are able should go aband and lead the way to encourage the others. If we have the others if we the others. If we have the others if we have an entire finishers, such that way the encourage the others. If we have the others if we the others if we have an entire finishers, such that way the encourage will some and the way to encourage the others if we the others. If we have the others if we have an entire finishers, such that way to encourage the others if we the others. If we have the others if we have an entire finishers and received will some an entire finishers and received will some an entire finishers and the way to encourage the others if we have the other if we are child the way the heat the other in the oth amter and rich mines, as its immediate adjuncts; with unlimited natural power for machinery at its doors, it is not to be supposed that the city of Spokane will disappear amid even more widespread a confiagration than that which has just visited it. Throughout all the excitement attendant upon the destruction Sunday night, there was a manifest disposition on the part of all to assist in staying the confiagration, and there were none of the scenes of disorder and piliage that have marked the experience of other like affilted cities. Order was maintained throughout, and to-day the spirit of recuperation was manifested in a marked degree.

The first question generally was: "Can the stoneouters and hickmasons supply the demand?" For the purpose of determining this important question, a reporter visited the various firms engaged in cutting stones, quarrying the same, making bick, burning lime, etc.

Myrick & Go., corner of Stevens street and

ne, etc. Myrick & Co., corner of Stevens street and allroad avenue, were the first called upon. Myrick & Co., corner of Stevens street and Railroad avenue, were the first called upon. Mr. Myrick said: "The Dorset Granite Company would take all the orders given them. They have been running a full force of cutters, which they are prepared to increase as tast as the occasion demands. They have orders from Ellensburgh, Seattle and this city, all of which they expect to fill promptly and attend to any other business that may be demanded. any other business that may be demanded of them. The marble quaries at Fort Spokane have not yet been developed, and consequently are not available to meet immediate demands. The company lost little in the late fire, and were running yesterday as if nothing had happened.

Mr. John Keenan, at Monroe and Riverside also has a full force at work, and is prepared to take all orders, accommodating himself and his pasons to the exigencies of oircumstances. There is no doubt whatever that all the cut stone desired can be furnished in Spokane.

ever that all the cut stone desired can be furnished in Spokane.

President McNab, of the Stone Quarrying Company, est that his company was present to furnish all the gione from the quarrice that the outlers could handle.

The Washington Brick and Tile Company was next visited. It was found that Harry Brook was abent, having gone to Porlland to superintend the ordering of iron for a new block, which may probably be changed in design since the disaster.

would be anic to supply all immediate of mandle. In Air meantime they have ordored the most powerful dry press muchine to be obtained, and expect it in a short time to produce as fine brick as can be obtained in the United States. They will erect the necessary buildings to continue work throughout the winter. They have also anticipated the extraordinary demand, and will increase their output as fast as possible. Large lime kilns are in progress of erection, and the demand for that useful article in the reconstruction of the city will be promptly med. Mr. Spear will go Maston Saturday to hurry up the delivery of the necessary machinery already ordered.

Altorether, in the face of unparalicled disaster, the people of Spokane Falls are justified in locking forward hopefully to a speedy rebuilding of the city.

destroyed, our pluck and energies remain. He expects to erect some buildings as soon as possible.

Lames M. Glover said: "The outlook is very sheerful. The people are much more hop-citi-siter the excitement of the fire has died down. An aggregate of \$100,000 has heen paid for the property on the corner of Kiverside avenue and Howard street, and as soon as the materiat can be procured and the men can be put to work, new buildings will go up, which means that others will follow. The buildings at this point are to be magnificent atructures of brick, from and stone. Outside capitalists, finding that the men who built up the city have confidence in its future prospects, have no resistancy in furnishing money for legitimate purposes, and when the capitalists see these men coming promptly forward to rebuild the city after such a disastrous confagration, their faith is renewed. The city will go right up and be grander than ever."

H. L. Arlson—"I recognize that the calamity is great, but the enterprise and public spirit of the citizens is far greater than the calumity. The citizens will not fail to take hold of the disaster, and bring out richer results in an improved and modern city of stone, from and brick. The resources which

suits in an improved and modern city of stone, iron and brick. The resources which made our city great still remain, imperishs ble; no fire can sweep them away. I believ the ordinance should be strictly enforced made our city great shill remain, imperisan-ble; no fire can sweep them away. I believe the ordinance should be strictly enforced, and that nothing but brick and stone build-ings should be allowed within the fire limits. Arrangements ought to be made by prop-erty-holders within the fire limits to com-mence building at once, as plenty of money can be secured from loan companies, who can be secured from loan companies, who have airendy expressed their confidence by telegraphing that money will be furnished for building purposes. If the policy of working night and day shifts is largely adopted, there is no reason why we should not have a magnificent city here before the close of Desember next. I feel certain that the city will be rebuilt in a grander style than before the fire. I have not a single piece of property I would sell for a delivar less than before the fire. I will build on Main and possibly upon Riverside agence.

wided the city coulons' meeting Monday. I owned as many frame buildings within the fire limits as anyone in the city, so as far as my personal interests are concerned it would pay me far more if frame buildings were allowed within the fire limits, but i view it as extremely detrimental to the best interests of the city to allow such buildings to be constructed. By all means build brick buildings, and build for the future, not for the present. C. R. Burns ventured the assertion that within eighteen months we will have more buildings in Spokane Falls than before the fire. Mr. Burns and mysoil have been deterred from putting up brick structures owing to the large number of frame shanties that were in the business portion of the city. But now we pronose to erect a four-story building 77x70 feet."

Dr. McLean said the new zeal and entorprise shown by the citizens would enlist;

D. B. Fotheringham said: "You cannot say too much about the future prospects of this city. Although the fire was a greathlow to the city, yet it will not dempen the ardor of the men who placed it where it was before the fire. I have no property for sale at any price, and I consider inside property to be worth more than ever. Loan companies are already the grander than before the fire."

Dr. Burch said: "The prospects are brighter than ever. The men will go to work, and they are already at work. The prospects are brighter than ever. THE PENSION BUREAU.

Corporal Tanner Unjustly Orbitcised By the Bossecantic Frees.

Washington, Aug. 7.—Corporal Tanner continues to be the target for certain newspaper correspondents. They seem to have their orders to believe nothing which we this seem to place Tanner in a most favorable light before the country, and he is receiving as many additional shafts now as at any time should be not the before the country, and he is receiving as many additional shafts now as at any time should be not seed to the management of the pension office. The investigation consisted fine his attitude to lower the hamners for the pension of the pension of the open of Tanner's fact that the cry of "wither west" to raise.

The dawnership press has been fibred with state-ments that Commissions I sharer will not attend the annual meeting of the Grand Army at Milwanker, because the president and secretary of the interior do not desire to have him do so. The reason which these keepers of consolence of the administration fears the effect of Tanner's speaking. They say that he has a hary and moontrollable month. Howeard difficult to may be for Corporal Tanner to resist the powerful impulses of his own elequence, it is very evident that he has not received any suspending from the president or secretary of the interior that he ought not to go to Milwankee. THE BLACK DIAMOND.

Captain Shepard's Report Received at the Treasury Department.

Washington, Aug. 7.—The proof of Captain Shepard, commanding the revenue steamer Rush, in regard to the seizure of the British sealer, Black Diamond, malled at San Francisco, has been received at the treasury department. Acting Secretary Batcheller refuses to give it to the press, but admits that it confirms substantially the newspaper reports concerning the seizure. It contains no reference to the escure of the vessol, for the reason that the escape bad not occurred when the report was written. Neither does it give any explanation with regard to the smallness of the crow placed in charge of the prize, but the report is said to indicate that the vessel was not paroled, but subject only to the control of the prize crew. Acting Secretary Batchellerssid, as the question scens to assume political importance, he preferred to do nothing in the matter without consultation with Secretary Windom.

An Alterative Medicine, don't forget that everything depends on the kind used. Ask for Ayer's Sarsapardla and take no other. For over forty years this preparation has had the endorsement of heading physicians and druggists, and it has achieved a success unparalleled in the history of proprietary medicines. "For a rash, from which I had suffered some months, my father, an M. D., recommended Ayer's Sarsapavilla. It effected a cure. I am still taking this modicine, as I find it to be a most powerful blood-purifier."—J. E. Cocke, Denton, Texus.

Mandrake Pills have a value as a household remedy far beyond the power of language to describe. The family can hardly be true to itself that does not keep them on hand for use in emergencies.

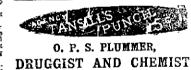

* MINITAKE # Is the only vegetable substitute for that

dangerous mineral, MERCURY, and while its action as a curative is fully equal, it possesses none of the perilous effects. In Constination, Mandrake acts upon the bowels without disposing them to sub-

sequent Costiveness.

No remedy acts so directly on the liver, nothing so speedily cures Sick Headache, Sour Stomach and Biliousness as these

NO FEAR OF FIRE HERE

The O R d N docks line the civer front from
the street to half was between Ash and A
streets. The company has good are service here, rime street to half way between Ash and A streets. The company has good fare aervice here, and a blaze could not get much beadway. During the host spoil the roofs of the docks have been wet down regularly every day, as a precaution against fire.

Between the O.R. & N. docks and the foot of A street fire.

Between the O.R. & N. docks and the foot of A street fire could be easily conncolled. It would bluen only rubbiab.

The upper portion of the dock between A and B streets is filled with farm macdidnery and hard ware. The ship Tills E farbuck recently unloaded a general cargo on the lower portion of the dock which is now being carted away. There is a quantity of coal oil in the upper part of the wharf between B and 6 streets, but it will soon be moved so the reporter was informed it is in litigation, or it would not have remeined there so long. The oil was in bad shape when it was received, and considerable oil 'It lacked through the floor to the lower dock thus effording an exce least opportunity for some one to start a fire. Saveral persona tried to save the oil by placing receptacles under the place where it leaked through the floor. This aroused the lears of a number of timid persons. When Captain Flanders heard of the danger he put a watchman on the dock, and covered the saturnted planks with several inches of sand.

on the dock, and covered the saturated planks with several inches of sand.

The upper portion of the whirf between (and D streets, contains merchandies, and on the lower part goods are received for the stramer Alianue between I and L streets, on the lower dock there is some lime a little cont and a low pitics of codar jumber and at I o upper part, there is merchandiss. The J withing dealight (outpent) a work are between E and F streets. There is fire ser rich bere.

SOUTH OF STARK STREET

From Stark strest south there are but very few
places where there is any protection against fire
and in no place is the paratection adequate. To
the question "what would von do in case of
first" the name reply was received "We could
do nothing. We would be no the mercy of the
figures, and would only rely on the prompt ar
river of the first department to stay any extensive
configuration." While shout all of the wharves there is more or less inflemenable material, most of them are

NO FACILITIES AT ALDER STREET

The north half of the dook between Alder and
Morrison streets is occupied by Faced up & har
rell with hay, straw and feed. The noarest water
plag, as it is all along the river front in this a cin
ity is on Front street. There are no lacilities for
fighting the dames if the tire is once wond started.
The south one or the upper wharf is occupied by
a saloon, restaurant and commission house, and
these have water connections with the Front
street man.

a very signit agree in case of the protection relatively amounts to nothing. We must have larger water modere, no doubt, is right, for the small inch hose in case of a blaze would be a meripleything. There is a large extraord doubt platform, bedfires quite a distance of elevated rallway rack which would hurn rapidly when once ignited the United States browers at the foot of Harciason street, is portages the beat fortified building along the river front. But dea an old sinch plus and a new inch put rought in only two wocks are the browers could due may ordinary fire with lager boor.

The lumber mills of Smith Bros and of the Portland Laurhering and Manufacturing Company are better equipped for fire than more propile would talank. Both companies have just put in a four inch pipe connecting the mills with the new in in on water street. Rach mill hus about 250 feet of 252 finch hose besides meanly as manufacturing surroughout respectively. And to conclude with content the sweet part and to conclude with content the two light watchines. As the roughny is allowed the mills may be said to can low street. Rach mill have been making is allowed the mills may be said to can low, a consonable immunity from inc.

Every binniness man along the river front from Bark street to Pennoyer's mill who was approached on the subject spoke of the imperative need of more dire protection. The reason large comfigurations have not occurred in the past, say thing else. The conveniencies for putting out in the sancount of property unprotected is taken in the cancel and the sancount of property unprotected is taken in the cancel and and the configurations have not occurred in the past, say thing else. The conveniencies for putting of a fire protection is a more and the unconfiguration.
